

Technical conditions of use of the SCAUT application

I) General section

1. Technical conditions of use of the SCAUT application (hereinafter referred to as "SCAUT").

II) Software requirements

1. Internet browser

SCAUT is tested and fully supported in the following web browsers:

Microsoft Edge 107 and later stable versions

Mozilla Firefox 106 and later stable versions

Safari 16.1 and later stable versions

Google Chrome 100 and later stable versions

2. Output display

To view some of the output from the application, an additional application may be required to be present on the user's computer. At a minimum, print output is compatible with the following applications:

Microsoft Office Word 2010, Excel 2010 and later stable versions (you can also use their free version - viewer)

Adobe Reader 15.0 and later stable versions

III) Hardware requirements

For running SCAUT, a desktop or mobile device with a minimum HD screen resolution is recommended, always with up-to-date software

IV) Communication requirements

1. For the proper functioning of SCAUT, functional access to the Internet is required. For comfortable use, SCAUT recommends using a connection with a minimum speed of 2 Mbps
2. Access, setup and operation of the connection is the responsibility of the user and is not part of the service provided. The provider is also not responsible for the correct configuration of the proxy server and firewall on the user's side.
3. Other

The Provider is not responsible for any technical limitations of browsers and other software add-ons not provided by the Provider. The Provider is also not responsible for the functionality of SCAUT on newer (updated) versions of the applications mentioned above.
